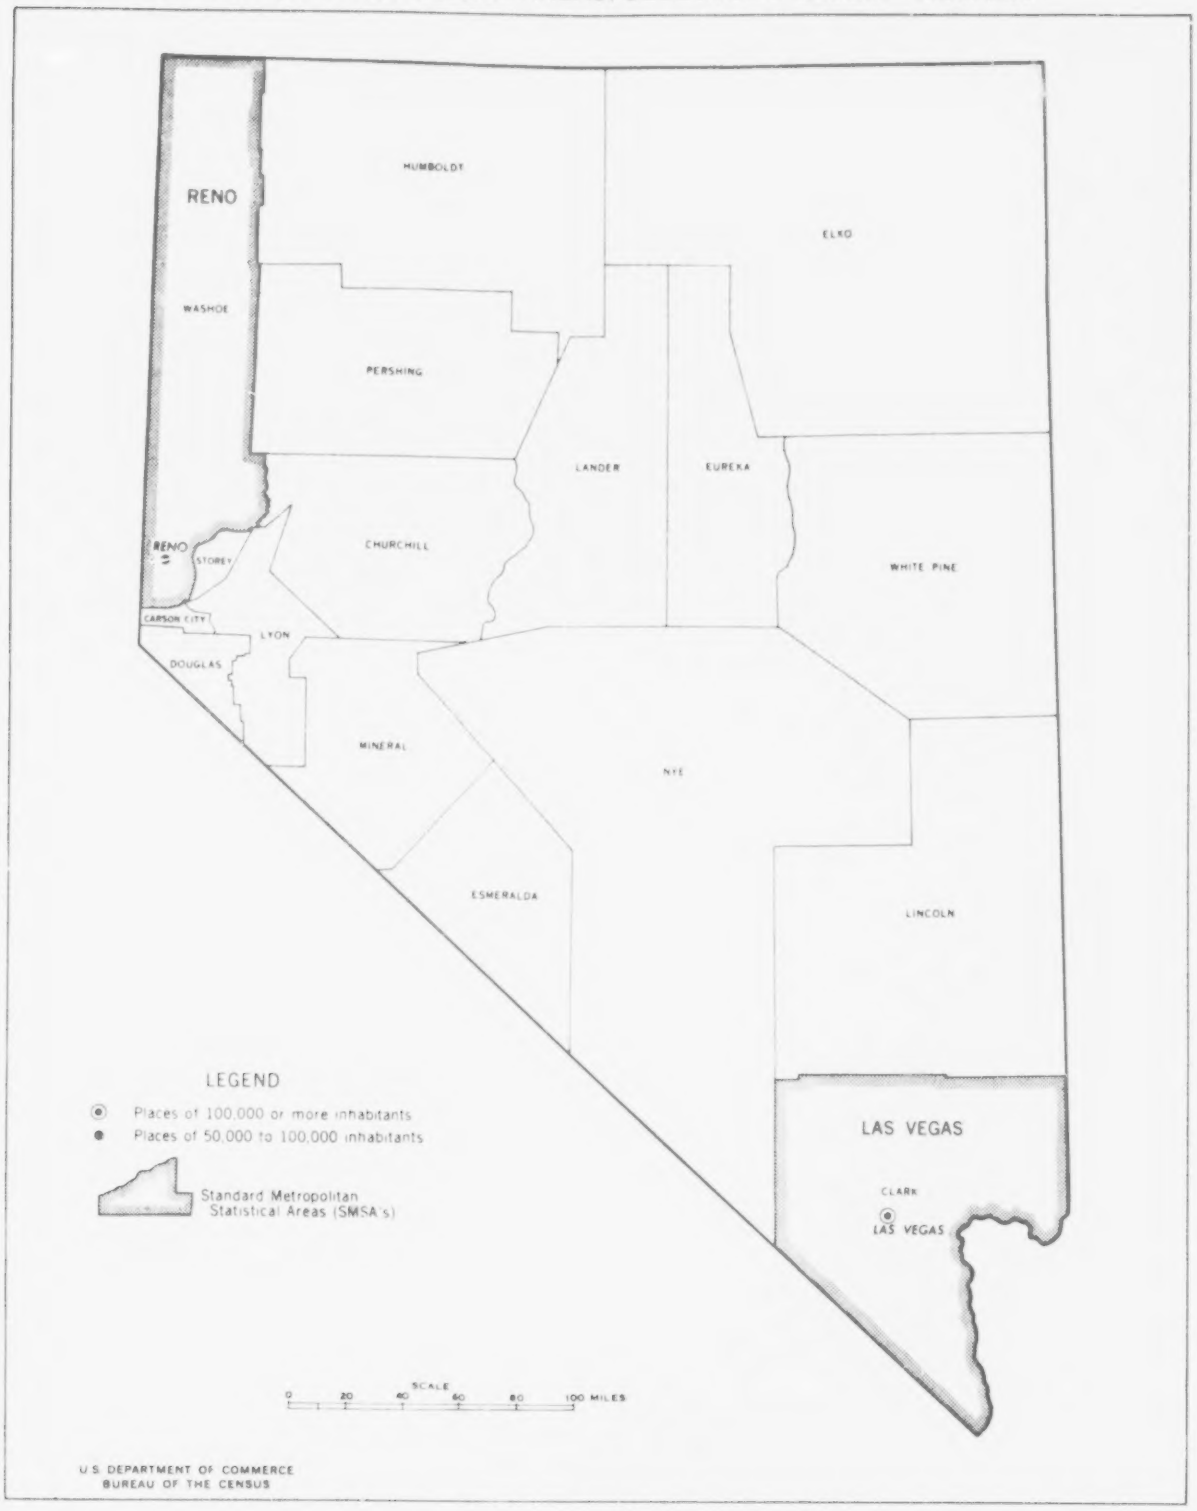
COUNTIES, METROPOLITAN AREAS, SELECTED PLACES: NEVADA



PREFACE

The Nevada Revised Statutes, NRS 345.090 directs the State Planning Coordinator to compile and publish a statistical abstract each odd numbered year. This is the 1979 edition of the Nevada Statistical Abstract and is a compilation of information and data on state and local governments and information and data relating to business and the economy of Nevada. The purpose of this document is to bring together data often requested in a readily available format and to identify the sources of this information.

Suggestions, as well as notification of errors or omissions, from users of the Nevada Statistical Abstract, 1979 will be appreciated so that future editions may be improved. Comments should be forwarded to:

CHAPTER I

POPULATION

The total resident population of Nevada as of 1978 was estimated provisionally to have been 663,000. This was approximately 36 percent greater than in 1970. Most of this growth was due to net migration. Nevada had the highest growth rate in the U.S. between 1970 and 1978, followed by Alaska, Arizona, Wyoming, Florida, Idaho and Utah. The Nation's population, between 1970 and 1978, increased by 7.3 percent.

Douglas County has been the State's fastest growing county with a 108% increase in population between 1970 and 1978. Carson City has experienced the greatest percentage increase in population for Nevada cities between 1970 and 1977 with a 76% increase.

Nevada's population is expected to continue to grow over the remaining decades in this century but at decreasing rates. By the year 2000, Nevada's population is projected to be 1,585,000.

The State has experienced rapid urbanization since 1920. In 1950 for the first time, Nevada's urban population was greater than the rural population.

Nevada has a relatively young population with approximately 70 percent being under 45. In 1970 the median age was 27.8. Other characteristics of the State's population are: In 1970 approximately 51 percent were male and 49 percent female, and the State's minority population was 8.3 percent of the total.

CHAPTER II

HEALTH AND VITAL STATISTICS

In 1978, resident births reached the highest number since 1964. The crude birth rate climbed to 16.6 births per 1000 persons in 1978 after reaching a low of 15.3 in 1975. The death rate in Nevada continued to remain below the national average. Since 1950, diseases of early infancy have drastically declined while cirrhosis of the liver has increased. Heart disease continues as the leading cause of death of Nevadans, followed by cancer, accidents, cerebrovascular diseases and suicides.

Nevada's health manpower is unevenly distributed among its counties with the heaviest concentration of physicians, dentists and nurses working in the urban counties.

The cost of health care has risen rapidly in Nevada as elsewhere. Between 1975 and 1977 the average cost per day in a community hospital increased from $182 to $241. The average for the U.S. as a whole increased from $151 to $198.

CHAPTER IV

EMPLOYMENT AND EARNINGS

Total employment increased from the 1975 level of 260,500 to 316,800 in 1978, while unemployment was down from 27,800 to 15,000. By the end of 1978 Nevada's unemployment rate was 4.5 percent. This was down from the 1975 high of 9.6 percent. The national unemployment rate in 1978 was 6.0 percent down from the 1975 level of 8.5 percent.

The leading employment sector continues to be service. In 1978, it accounted for approximately 42 percent of total State employment. The second and third leading sectors were trade and government at 20 percent and 15 percent, respectively.

Average weekly earnings increased between 1970 to 1978 with the greatest increase in earnings taking place in the communications and utilities industry with 95 percent.

CHAPTER V

INCOME

Per capita personal income of Nevadans increased by 106 percent between 1970 and 1978 compared to the national 98 percent pace.

Wage and salary disbursements totaled $4.5 billion, making up 88 percent of total labor and proprietor's income in 1978. The dominant sector was services which accounted for $1.9 billion or 38 percent of total personal income in 1978.

Personal income data for Nevada's counties showed that in 1978 Washoe County had the highest per capita income. Poverty data shows that fewer families are below the poverty line in Nevada than for the Nation.

CHAPTER VI

ENVIRONMENT AND GEOGRAPHY

Nevada covers 110,540 square miles which makes it the seventh largest state in the Nation. It is surpassed in size by Alaska (586,412 sq. miles), Texas (267,339 sq. miles), California (158,693 sq. miles), Montana (147,138 sq. miles), New Mexico (121,666 sq. miles), and Arizona (113,909 sq. miles).

Eighty-three percent of the land in Nevada is owned and administered by the Federal government. Only Alaska has more federally controlled land.

The State is considered the "hub of the West" and is bordered on the north by Oregon and Idaho, on the east by Arizona and Utah, on the south by California and Arizona and on the west by California.

Nevada lies almost entirely within the Great Basin and range province, which is characterized by isolated mountain ranges separated by basins. The highest elevation in Nevada is Boundary Peak at 13,140 feet in Esmeralda County and the lowest elevation is 490 feet on the Colorado River in Clark County.

The climate of Nevada is characterized as semiarid with average annual precipitation of approximately nine inches. Temperatures vary widely between the northern and southern regions of the State.

CHAPTER VII

TOURISM AND RECREATION

Tourism is Nevada's leading industry. Although this lead can be contributed almost entirely to gaming, there are other natural and man-made resources that are important as both tourist attractions and as recreational opportunities.

Gross taxable gaming revenues in 1979 were $2.1 billion. This was an increase of 88 percent over 1975. The 16 State Parks recorded 3.4 million visitors in 1979, up 9 percent over 1978 and 60 percent over 1977.

Approximately 60 percent of the visitors to Nevada's parks are residents of the State. The leading source of out-of-state visitors is California, accounting for 23 percent of all State Park visitors in 1977.

In 1978 and 1979, hunting and fishing licenses issued increased to higher then the 1970 level, following a decline in the mid seventies.

CHAPTER VIII

GOVERNMENT AND TAXES

Nevada has 16 counties, 16 incorporated cities, one independent city and 43 unincorporated towns. The State has two Standard Metropolitan Statistical Areas as defined by the U.S. Bureau of the Census--Las Vegas and Reno. Carson City, an independent city, is the State Capitol.

The majority of State revenues flow into the general and special revenue funds. The general fund is the major operating fund of the State and receives its income from taxes, licenses, fees and fines, administrative charges, use of money and property, Federal government, local governments, the University of Nevada school fund, and other sources. Special revenue funds are derived from the same sources as the general funds.

Taxes provide the majority of revenue to the State general fund. In the 1978 FY, taxes accounted for 95 percent of general fund revenues with sales and use tax providing 39 percent and gaming taxes providing 37 percent.

Nevada's expenditure policy reflects the expansion and increased cost of government service. In the fiscal year 1977-78 total State expenditures were $466.7 million. The largest expenditure being for educational programs at 33 percent of the total.

Total Federal government outlays in Nevada for the fiscal year 1978-79 were $1.67 billion. The Department of Health, Education and Welfare was the largest source of Federal funds, providing 25 percent of the total, followed by the Department of Energy and the Department of Defense, each with 20 percent.

CHAPTER IX

AGRICULTURE

Due to the semi-arid climate, crop production is rather limited in Nevada. With average annual precipitation slightly more than 9 inches and a growing season about 120 days, livestock and forage production has evolved into the major portion of Nevada's agriculture.

The national trend toward fewer farms of greater size has been experienced in Nevada. In 1969 there were 2,112 farms in Nevada with an average size of 5,070 acres. By 1974 the number of farms had dropped to 2,076 with the average farm size increasing to 5,209 acres.

The value of agriculture output increased to 168 million in 1978 for a 109 percent increase since 1970. Gross farm income also had increased since 1970 from $94.3 to $188 million in 1978. However, net farm income has been sporadic since 1970 rising to $54 million in 1973, declining to $11.7 million in 1977 and increasing to $25.4 million in 1978.

a Farms are defined as places on which agricultural operations larger than a specified minimum were conducted at any time during the census year under control of an individual management.

Places of less than 10 acres were counted as farms if sales of the agricultural products amounted, or normally would amount, to at least $250. Places of 10 acres or more were counted as farms if the sale of agricultural products for the year amounted, or normally would amount, to at least $50.

CHAPTER X

MINING

Nevada continues to be an important mineral producer. In 1978 the value of mineral production was $195 million. This represented a decrease of 28 percent from 1977 but an increase of 4 percent over 1970. This decrease was due to reduction of copper produced in 1978.

Gold replaced copper as the single largest contributor to the total value of mineral production in Nevada. In 1978 gold contributed over 23 percent to the total value of mineral production.

The number of mines, mills and smelters in operation has sharply risen since 1967, however total employment has declined.

CHAPTER XI

HOUSING AND CONSTRUCTION

In 1970 occupied housing units numbered 160,052, an increase over 1960 of 75 percent. There were 171,635 year-round housing units in Nevada in 1970. During the 1970-78 period there were over 125,000 housing units authorized, with almost 25,000 in 1978.

The total valuation of construction in Nevada for 1978 was $1,206 million, an increase of 31 percent over 1976. Residential construction was the largest contributor to the 1978 value of construction, accounting for 56 percent.

CHAPTER XII

MANUFACTURING

Nevada's manufacturing sector is not as large a portion of the State's economy as for the Nation. In 1970 approximately 5.1 percent of the State's employment was in the manufacturing industry as compared to 25.2 percent for the Nation. In 1977, 22.2 percent of the wage and salary employment was in the manufacturing industry as compared to 4.6 percent in Nevada.

In 1977, approximately 15,200 persons were employed in manufacturing products which included food, lumber, chemicals and electrical equipment. The total number of manufacturing establishments in 1977 were 731 with 19 percent associated with printing and publishing.

From 1972 to 1977 the number of establishments, employment and value added by manufacturing incresed 64 percent, 52 percent and 140 percent, respectively.

CHAPTER XIII

TRANSPORTATION, COMMUNICATION AND PUBLIC UTILITIES

For many of the State's counties, total mileage of roads and streets has increased since 1960. In the two largest urban areas of Nevada, Clark and Washoe Counties, total mileage between 1960 and 1975 increased 77 and 46 percent, respectively. However, miles of railroads in Nevada, as in the United States as a whole, declined since 1952.

Motor vehicle registration has increased 69 percent from 1971 to 1979. The number of drivers licenses in force has also grown from 337,155 in 1969 to 565,530 in 1979 for a 68 percent increase.

Traffic at Cannon International (Reno) and McCarran International airports continued to increase with 77% and 18% increases, respectively, in passengers enplaned and deplaned between 1976 and 1978.

Traffic fatalities in Nevada have increased since 1974 when there were 216 fatalities to 312 in 1978 for a 44% gain.

Nevada had 46 newspapers with daily, weekly or monthly circulation, 36 radio stations, and 7 television stations in 1976. There were 773,602 telephones in use, as of December 1979, in Nevada compared to 575,080 as of December, 1976 for a 35% increase.

In 1978, the average Nevada Power Company residential customer used 1,242 kilowatt hours per month while the average Sierra Pacific Power Company customer used 669 kilowatts.

[a] The classifications of Nevada's roads and streets used in this table are based on construction funds. The principle funds for construction of the Interstate System and the Federal Aid Systems are obtained from matched Federal and State moneys. Non-Federal Aid Systems funds come from State, County, or City funds or a combination thereof.

Year	Total Nevada Generation[a]	Total Flows Into Nevada[c]	Total Flows Out of Nevada[d]	Total Nevada Sales[f]	Total Losses and Unaccounted for[g]
1977	16,716,463	3,686,377	9,776,680	7,984,796	2,641,364

[a] Total Nevada generation is total energy supplied by all Nevada-based electrical generating facilities, including energy supplied by Hoover Powerplant for Nevada consumers, net generation at Mohave, and energy produced by Kennecott Copper Corp. for resale to utilities. Energy produced by Kennecott and Stauffer Chemical for self-utilization it not included.

[b] Increase due to start-up of Mohave.

[c] Total energy flows into Nevada includes out-of-state generation (e.g., Navajo) or utilinecott and Stauffer purchases made by or for Nevada utilities for sales to the utilities' customers. Energy flowing into Nevada, none of which is directly utilitized in the State, is not included (e.g., energy flowing in on the 400 K V DC transmission line is not included).

[d] Total energy flows out of Nevada includes sales of energy produced or purchased for or in Nevada for sales outside of Nevada (e.g., Sierra Pacific Power Co. sales to California customers). Excluded is energy not included in generation or flows into, such as energy generated at Hoover Powerplant from units on either the Arizona or Nevada side which do not supply Nevada markets.

[e] Beginning in 1971 with the start-up of Mohave, Nevada became a net exporter of electrical energy.

[f] Total Nevada Sales is sales of electrical energy to end-users in Nevada. For breakdown by classification, see Table XIII - 15.

[g] Losses and Unaccounted For is generation and flows into minus sales and flows out of.

CHAPTER XIV

WHOLESALE AND RETAIL TRADE

In 1978, the trade sector continued to be the third leading income generating activity in the State with 15 percent of the total personal income produced by activities in this sector. Approximately 19 percent of total wage and salary employment was accounted for by trade activities. From 1967 to 1972, the number of wholesale and retail trade establishments increased 34 an 39 percent, respectively. Between 1972 and 1977, the number of wholesale and retail trade establishments increased 22 and 11 percent, respectively. Total sales for the trade sector in 1977 was $4.8 billion, a 91 percent increase from 1972.

The most active wholesale trade businesses provide machinery, equipment and related supplies. In 1978, these businesses had sales of $272.4 million and accounted for 16 percent of total wholesale trade employment.

In retail trade, automotive dealers account for most sales with food stores a close second. In 1978, total sales were $637 million for automotive dealers and $593 million for food stores. However, most employment is found in eating and drinking places. These businesses accounted for 29 percent of total employment in 1977.

CHAPTER XV

FINANCE, INSURANCE AND REAL ESTATE

In 1978, Nevada had nine banks and seven savings and loan associations. Assets of insured commercial banks in Nevada increased to $3.3 billion from $2.1 billion in 1975.

In 1978 the State's commercial banks had loans in the amount of $1,388 million. This was an increase of 66 percent from 1975. Bank investments and deposits also increased between 1975 and 1978 by 38 and 53 percent, respectively.

Total assets of insured savings and loan associations also increased. From 1975 to 1977 total assets grew 87 percent. Mortgage loans and contracts increased during this period by 86 percent.

The number of corporations in Nevada in 1975 was 4,093 and 7,296 in 1979. The largest business structure is the proprietorship. In 1976 there were approximately 32,374 in Nevada. The number of business failures per year has declined in Nevada since the peak year of 1967. In that year there were 106 failures as compared to 1[illegible] in 1978.

[a] Total insurance coverage of all legal reserve life insurance companies operating in Nevada.

[b] Life insurance usually issued in amounts of $1,000 or more with premiums payable on an annual, semi-annual, quarterly or monthly basis. The term is also used to mean "straight life insurance."

[c] Life insurance issued usually without medical examination, on a group of people under a master policy.

[d] Life insurance issued in small amounts, usually less than $1,000, with premiums payable on a weekly or monthly basis. The premiums are generally collected at the home by an agent of the Company.

[e] Term life insurance issued through a lender or lending agency to cover payment of a loan, installment purchase, or other obligation, in case of death.

[f] In thousands.

[g] In millions of dollars.
